***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on May 24, 2004 has been entered.

***Allowable Subject Matter***

2. Claims 1 and 2 are allowed.

3. The following is an examiner's statement of reasons for allowance: The art of record does not teach or fairly suggest the turbo component for a turbocharger having a sintered powder composition, as claimed, wherein the Cr carbide or Cr and Mo carbide is dispersed in the matrix at a density ratio of 95% or more whereby the sintered powder composition is made of a mixed powder having 1-3.3 mass% of Fe-P powder including P:10-30%, and 0.5 to 1.5% of graphite powder, added to Fe alloy powder comprising, in ratio by mass, Cr: 25 to 45%, Mo: 1 to 3%, Si :1 to 3%, C: 0.5 to 1.5% and the balance of Fe. The criticality of the mixed powder proportions is established by the comparative test data disclosed on page 10 of applicant's specification. Moreover, applicant's 1.132 declaration and remarks submitted May 24, 2004 points out the alloy of the present invention has a ferrite-type stainless steel microstructure containing Cr carbides or Cr and Mo carbides whereas the prior art, Takahashi, alloy has a pearlite, bainite or martensite microstructure containing cementite. Moreover present invention alloy is

directed to a turbo component for a turbocharger having wear resistance and corrosion resistance at high temperature. In contrast, Takashi discloses an alloy having abrasion resistance and is used in an internal combustion engine as the sliding plane of a rocker arm, a valve seat, a piston ring, or a cylinder line .

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
